Domain 2 : SCIENCE + SOCIAL SCIENCE

Task1:-Prepare a herbarium

Science herbarium is a collection of dried and pressed plant specimens, organized and preserved for scientific study and research.

How Herbarium Specimens are Prepared:

Step 1:- Collection: Collect Leaves and flowers of different plants. Group them as flowering and non-flowering plants.

Step2:-Drying: Dry the specimens using a press.

Step3:-Mounting: Paste the dried specimens on herbarium sheets or scrapbook with a label mentioning the common name of the plant,scientific name of the plant,where is it found generally,type of soil and temperature needed to grow the plant,and its special features.

Step4:-Preservation:-preserve it from water so that it doesn't get spoiled.

Task2:-Make a bird nest and feed with some nuts, grains and leave some of them in a garden nearby. Keep a bowl of fresh water everyday near the bird feed.Click and paste two pictures of yours doing this task in the science notebook.

Task3:- Write ingredients and their sources to prepare tasty tea in a tabular form.

Wait , wait, wait!

Not only write on notebook, prepare some cups of tea with ingredients as per your choice and

No, no, no

Don't waste the tea, serve it to your parents and other family members and enjoy your family time.....

Task 5 Revise the syllabus of science and sst covered so far.

Domain 3 : MATHS

1. Make two different Patterns Using waste material
